British, Italian and Brazilian citizen (full right to work in the UK) · Full UK driving licence and own car

PROFILE

Second-year BSc Computer Science student at the University of London (Goldsmiths) with the Google IT Support and Google Cybersecurity Professional Certificates and hands-on development experience as an independent iOS app developer. Passionate about artificial intelligence: I use AI tools daily to build apps, automate workflows and accelerate my own learning, integrate AI APIs into my own software, and am working towards the Machine Learning and AI specialism of my degree. Over ten years of public-sector experience working daily with case-management systems, complex data and demanding customers has built strong troubleshooting, documentation and communication skills. Now seeking to move into an IT role, support, applications, or junior development. I have a genuine passion for technology and a calm, user-focused approach will add immediate value. Studies are part-time by distance learning and will not affect working hours.

TECHNICAL SKILLS

- **AI & machine learning:** daily hands-on use of AI assistants and AI pair-programming tools to design, build and debug software; prompt engineering; integrating AI APIs (Anthropic Claude, Google Gemini, ElevenLabs speech and audio) into applications; experimenting with running AI models on local hardware; studying towards the ML & AI degree specialism
- **Programming:** Python, SQL, Swift (iOS), JavaScript (p5.js, HTML5 canvas); Git and version control
- **Systems & networking:** Windows, macOS and Linux command line; PC assembly, hardware diagnostics and maintenance; TCP/IP networking fundamentals; system administration and IT infrastructure services
- **Cybersecurity:** SIEM tools, Intrusion Detection Systems (IDS), risk and vulnerability assessment, incident detection and response, security automation with Python
- **Business applications:** Orchard housing management system (2+ years daily use), HomeLink choice-based lettings, Microsoft 365 (Word, Excel, PowerPoint, Teams, Outlook)
- **Developer tools:** Xcode, VS Code, App Store Connect, GitHub Pages, REST APIs, scripting and workflow automation

EDUCATION & CERTIFICATIONS

BSc Computer Science — University of London (Goldsmiths) — part-time, distance learning 2024 – present

- Second year, on track for a strong classification. Completed modules: Computational Mathematics, Introduction to Programming I, Introduction to Programming II, How Computers Work
- Currently studying Discrete Mathematics; planned specialism in Machine Learning and Artificial Intelligence

Google Cybersecurity Professional Certificate — Google / Coursera June 2026

- Nine-course programme covering security foundations, network security, Linux and SQL, assets, threats and vulnerabilities, detection and response, and automating security tasks with Python

Google IT Support Professional Certificate — Google / Coursera June 2026

- Six-course programme covering technical support fundamentals, computer networking, operating systems, system administration and IT infrastructure, and IT security

NVQ Level 3 Health and Social Care (QCF), 2019 · Police Learning and Deployment Programme, 2019 · Trinity College London English Level 2, 2010 · A-Levels including Maths, Physics, Chemistry and English, 2001

PROJECTS & PORTFOLIO

Draw & Learn — independent iOS developer 2024 – present

- Designed and built a children's educational drawing and learning app in Swift, taking it through the full App Store submission process including metadata, localisation and screenshot preparation
- Integrated AI throughout the product: AI-generated speech and sound effects for the app's mascot via the Gemini and ElevenLabs APIs, plus AI-assisted asset creation and localisation of App Store metadata; built Python automation pipelines for asset processing, audio generation and App Store screenshots

Interactive data visualisation app — university coursework — JavaScript (p5.js) live demo online

- Built seven interactive charts — three designed from scratch — including an animated pie chart of ONS population data, a waffle chart visualising results of my own Google Forms survey, and a staggered bar chart with easing functions; added hover tooltips, sound feedback and play/pause controls. Try it: synckser.github.io/data-vis

2D platform game — university coursework — JavaScript (p5.js)

live demo online

- Developed a complete, polished game with gravity and jump physics, enemy patrol AI, collision detection, factory-style object creation, a moving platform, boss chase, parallax scenery, sound effects and music, plus scoring, lives and restart logic. Try it: synckser.github.io/game-final

AI-powered tooling and automation — personal projects

ongoing

- Use AI coding agents as a core part of my development workflow — planning, generating, reviewing and testing code — build macOS utilities that automate document-processing workflows, and keep pace with the AI field hands-on by evaluating new models, APIs and local AI setups

EMPLOYMENT HISTORY

Housing Adviser — Cambridge City Council

Apr 2024 – present

- Manage a complex statutory caseload under the Homelessness Reduction Act 2017, carrying out assessments, making formal legal decisions and issuing statutory decision letters
- Daily power user of the Orchard housing management system and HomeLink lettings platform: maintaining accurate records, producing correspondence and monitoring performance data
- Explain complex legal and procedural information clearly to people in crisis — face to face, by phone and in writing — and resolve problems calmly under pressure
- Collaborate with internal teams and external partners (Social Care, DWP, police, probation, legal services, landlords) to deliver coordinated outcomes

Tenancy Support Worker — P3 Charity

Jan 2020 – Apr 2024

- Supported vulnerable tenants with benefits claims, rent arrears, budgeting and housing applications, working across multiple digital platforms and online government services
- Received a company award for improving remote team working during the pandemic — introducing conference calls, translation apps and online file sharing that cut travel and improved collaboration
- Worked from home from 2020 onwards, independently managing and prioritising a full caseload using shared calendars and Microsoft Teams

Police Officer — Cambridgeshire Constabulary

Mar 2019 – Sep 2019

- Responded to emergencies, managed conflict and made difficult decisions under pressure in line with law and procedure; trained in intelligence, evidence handling, statements and safeguarding

Earlier career — care and customer service

2010 – 2019

- Senior Support Worker / first-line manager, Cambridgeshire County Council (2014–2019), supervising a team of support workers; Care Consultant, Medacs Healthcare, managing recruitment, rotas and payroll for a large care team (2014); Healthcare Assistant, Bluebird Care (2014); Senior Waiter, Frankie & Benny's (2010–2014)
